

EMBASSY OF THE  
UNITED STATES OF AMERICA

No. 1591

The Embassy of the United States of America presents its compliments to the Department of Foreign Affairs of the Republic of South Africa and has the honor to request clearance for the United States-flagged research vessel R/V Melville to conduct marine scientific research in South African waters.

The R/V Melville proposes to conduct research during the period March 17 to May 13, 2003, with port calls to Cape Town from March 17-23 and from May 9-13. The objective of the research is to collect a suite of sediment cores from the southwest African margin, as detailed in the information attached for your perusal. Space can also be provided for South African scientific personnel, if requested at least one month prior to ship's departure. All data results will be freely shared with South African researchers.

The Embassy of the United States of America avails itself of this opportunity to renew to the Department of Foreign Affairs of the Republic of South Africa the assurance of its highest consideration.

Embassy of the United States of America,  
Pretoria, October 25, 2002
