5. **Geographical Areas**

5.1 Indicate geographical areas in which the project is to be conducted (with reference in latitude and longitude):

Poverty Bay and adjacent continental shelf and slope (38.5 S/178 E)

5.2 Attach chart(s) at an appropriate scale (1 page, high-resolution) showing the geographical areas of the intended work and, as far as practicable, the positions of intended stations, the tracks of survey lines, and the locations of installations and equipment.

*Map of the WSS. The dominant sediment source (the catchment) and sink (the shelf and slope) are illustrated as well as the direction of oblique subduction which greatly influences the morphology of the margin.*

*Bathymetry of study area. Existing and proposed model grids are shown by small and large boxes, respectively. Triangles show tripod deployment locations. Filled circles indicate time-series coring sites.*
